# Release Notes: Schoolwires® Centricity2™

Release 2.6

## New or Changed Functionality or User Experience

General

- We added a password strength indicator in self-registration, edit account on the end-user website and add a new user and reset password in Site Manager.

Workspaces

- The Content Browser in Site Manager displays as an off-canvas menu when viewed on mobile devices, including tablets. The width of the display determines the point at which the off-canvas menu displays.

- We simplified the feedback form that is on the How do I tab in Site Manager.

# Release Notes: Schoolwires® Centricity2™

Release 2.6

Pages & Apps

- We added a new Gallery Type of JavaScript to your Photo Gallery Apps. This is a mobile-friendly format and is the default setting for *new apps*. You can change your current Flash Gallery Type Apps to JavaScript and republish them if desired.
- You can enter text in a text box when working in an app containing the Schoolwires Flex Editor App on a mobile device, including tablets.
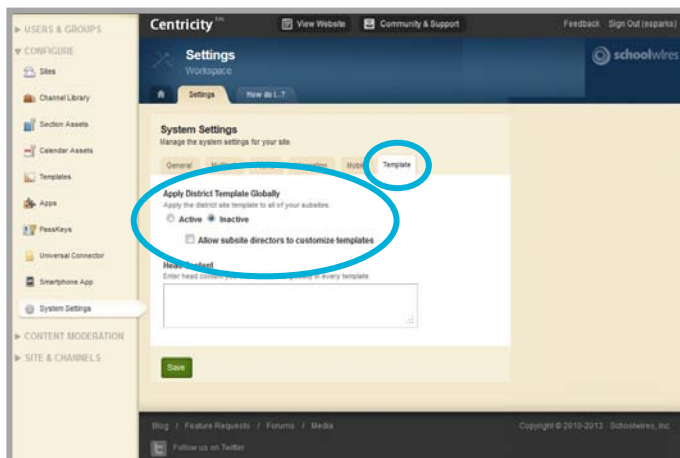

Configure

Templates

Schoolwires Library Templates can be individually purchased or a subscription can be purchased. All subscriptions include all templates in levels up to and including the subscription level purchased. You can preview all templates and manage your licenses within the Template Library in Site Manager.

System Settings

You can allow Subsite Directors to customize templates regardless of whether the district template is applied globally.

# Release Notes: Schoolwires® Centricity2™

Release 2.6

Smartphone App

- If they have not already agreed to the Schoolwires Terms of Use, when signing in to the website for the first time on the Smartphone App, users will be asked to agree.
- You can push *mobile* notifications to users from within Site Manager on your desktop as well as from your Smartphone. IOS users will not see the notification icon when they have the app open. Android users will see the notification icon whether the app is open or closed.

End-User Website

Since Pageflakes.com and Google are no longer supported, we removed them as options on the RSS feed subscription page. If you have MyView, that provides you with an additional option for the RSS feed subscription page.

MyView

- After the Nimbus 1.7 Release, Nimbus users will be able to view Nimbus events on their MyView Planners.
- After the Nimbus 1.7 Release, Nimbus users will be able to view Planner events from MyView on their Nimbus calendars.
